

MODUL PEMBELAJARAN

Class Diagram Perpustakaan

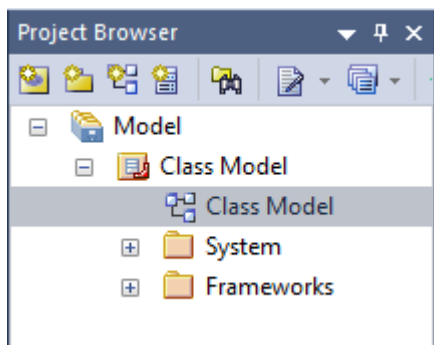

PETUNJUK:

1. Pastikan komputer telah terinstall dengan baik dan benar.
2. Buat project baru dan simpan dengan nama **class-2021.eap**
3. Beri checklist pada pilihan menu class dan klik ok

4. Klik dua kali **class model** pada jendela project browser

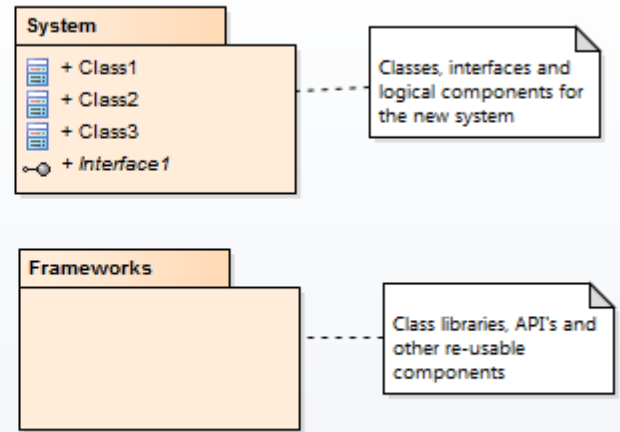

5. Maka akan muncul tampilan seperti berikut:

The Class Model is a logical model of the software system under construction. Classes generally have a direct relationship to source code or other software artifacts that can be grouped together into executable components.

The System package contains the classes and artifacts which are being built or designed as part of the current model. The Frameworks package generally contains classes and components that have been designed and built earlier and are being reused as part of the current project.
